Regulatory Contact: Denise Onyskiw
Phone: 303-692-3371

Agency: CDPHE

Purpose of Contact: Removing Room 283 Building Exhaust Fans Following Building Demolition

Discussion

The B771 Building Exhaust Fans (located in Room 283 of Building 771) will remain in place during building demolition. Subsequently, the fans will be removed from the debris pile and packaged in appropriate waste containers.

Room 283 has always been maintained as a Radiological Buffer Area (RBA), and ventilation is positive to other areas of the second floor. Detailed surveys have been performed inside three of the six fans, and no contamination in excess of the unrestricted release limits was detected. In addition, there is a very low risk that contamination would exist under the fans, based on a historical review received from a long-time Building 771 employee (see attached).

All fans will be thoroughly surveyed prior to demolition. If contamination is identified inside the fans, the fans shall be sealed and protected during demolition, and surveys shall be performed to verify that no contamination was released.

Copies of surveys shall be provided upon request.
